Betina Bergmann Madsen, City of Copenhagen  
In kollaboration with Melćijana Salispahić Starčević, City of Odense

# "SDG in procurement"

***Together we can make the world's most sustainable public procurement***

# The role of the procurement lawyer

- The procurement officers are one of the keys to making sustainable tenders. They have a unique opportunity to create these much needed changes. Being a procurement lawyer is not just an ordinary office job, as a procurement lawyer and public purchaser, you are a **very important key in bringing the political goal to life.**
- The small changes that you can write into the tender documents may be the decisive factor that contributes to the **food chain starting to move in a more sustainable direction** which then can create noticeable changes in primary production also in distant countries.

# Food procurement in the municipality of Copenhagen

- 90% organic in 2015
- Approx. **80,000** daily meals
- Approx. **40,000** diners daily
- **7,375,000** kg annually.
- 141.800 kg weekly.
- **1100** kitchens in **925** locations
- Approx. **1700** employees in the kitchens
- Approx. **40.300.000** EUR in annual food consumption
- **10 %** of all municipal procurement in Denmark

# The road to 90% organic

- **Copenhagen Eco-Metropolis 2001** vision stated in 90% organic target, and was implementet with 3 subtargets: 60% by 2006, 75% by 2011 & 90% by 2015
- **Cost of conversion:** approx. 1 mill. EURO per year for training and other cost to the conversion agents.
- **Training for kitchenstaff:** cook from scratch, less waste, less meat – more greens, use seasonal products = organic food with no added cost
- **Rotation programmes for unemployed.** Receive training and replace kitchen staff during courses = employment rate of 83 %
- **Organic principles** integrated in public kitchens through the kitchenstaff.
- Organic consumption is increasingly being measured by **government certification**
- **Change in procurement,** market development, products in season, diversity, sensory evaluation, and ....

# Brining the policy into life

## The procurement specialist

Rules and regulations

Municipality knowledge – politics of food

+

## Conversion agents

Organic and sustainable conversion

High quality in public meals

+

## Market dialogue

Market knowledge – sustainable goals in production

+

## Kitchen dialogue

Kitchen needs – what works and what need to be changed

---

Opportunity to do it differently – seeing new potentials.

## The sustainability criteria currently identified as relevant to work with are as follows:

- Packaging
- Prevent food waste
- Seasonality and diversity
- Climate-friendly food / climate weight
- Organic food
- Sustainable soy and - palmoil
- Sustainable fresh fish
- Fairly traded - certified goods
- Transport
- Nutrition in procurement
- SDG in tenders

Nummer	Eksempel på dansk perspektiv	Eksempel på krav	Leverandørbesvarelse
	<p><b>Vi skal afskaffe alle former for fattigdom i verden</b></p> <p>Fremme uddannelse, Nedbringe ledighed og skolefravær, Bekæmpe hjemløshed, Fastholdelse i egen bolig</p> <p><u>Omsider, hvor virksomheden kan handle</u> Forsøger leverandøren at begunstige led i værdikæden, der måtte belinde sig i udfordrede lande? Ansætter leverandøren udsatte grupper på heltd/deltidslønnet prædiktat? Er leverandøren ydelse <u>fastsatte</u> mærket (eller lignende)? Fremstiller leverandøren produkter, der er tilpasset fattige kunder?</p>	<ul style="list-style-type: none"> <li><input type="checkbox"/> <u>Fastsatte</u>-mærket</li> <li><input type="checkbox"/> Arbejdsskema</li> <li><input type="checkbox"/> Anstændige løn- og arbejdsforhold uden for EU (Code of Conduct, ansættelsesbevis m.m.)</li> <li><input type="checkbox"/> Sundheds sikring til medarbejdere</li> </ul>	
	<p><b>Vi skal stoppe sult, opnå fødevarersikkerhed og forbedret ernæring samt fremme bæredygtigt landbrug</b></p> <p>Sund kost, Økologi, dyrevelfærd, biodiversitet, klimavenlig mad, mindre kød og mere årstidens frugt og grønt.</p> <p><u>Omsider, hvor virksomheden kan handle</u> Fremmer leverandøren brugen af økologisk ernæring? Anvender leverandøren bæredygtige og ressourceeffektive produktionsmetoder, herunder fokus på vand- og energiforbrug? Doserer leverandøren udfordrede fødevarer til velgørenhed? Støtter leverandøren fødevarerhjælpsprogrammer?</p>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Økologi</li> <li><input type="checkbox"/> Dyrevelfærd</li> <li><input type="checkbox"/> Planbaseret kost</li> <li><input type="checkbox"/> Mindre madspild</li> <li><input type="checkbox"/> Emissionsfri transport</li> <li><input type="checkbox"/> Ø-mærket, Bedre Dyrevelfærd-mærket, <u>NaturSkønsm</u>, MSC, ASC.</li> <li><input type="checkbox"/> Minimere brugen af antibiotika</li> </ul>	
	<p><b>Vi skal sikre et sundt liv for alle og fremme trivsel for alle aldersgrupper</b></p> <p>Nedbringe kræft, KOL, diabetes, demens, psykiske problemer, misbrug af stoffer/alkohol, luftforurening, allergi. Fremme motion, sund kost.</p> <p><u>Omsider, hvor virksomheden kan handle</u> Er leverandøren proaktiv i bekæmpelse af arbejds-skader? Mindsker leverandøren eksponering for farlig luft og kemikalier? Er leverandøren proaktiv ift. mindske af usikre arbejdsforhold? Arbejder leverandøren aktivt på at skabe og udvikle et trykt arbejds miljø? Støtter virksomheden bekæmpelse af sygdomme som diabetes, malaria mv (eksplicit og/eller implicit)? Leverandøren forsøger at minimere antibiotika i koder?</p>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Arbejds-skader (due diligence)</li> <li><input type="checkbox"/> Luft-, vand- og jordforurening</li> <li><input type="checkbox"/> Støjniveau</li> <li><input type="checkbox"/> Kemikalier, herunder vækst- og hormonforstyrrende stoffer m.m.</li> <li><input type="checkbox"/> Trafiksikkerhed (skole, optagestet, fælt m.m.)</li> </ul>	

# Odense Municipality - 5 stage model: Identify, prioritize, qualify, implement and control

# SDG in contract

- The created document are to be filled out by the bidder
- In the document, all the requirements and criteria we ask for in the tender are linked to the SDGs so that we can more easily monitor their impact over the lifetime of the contract, and it gives space for the supplier to fill out the asked sustainable details.
- The supplier can describe actions and point out all the SDGs they are working with in their company, and that they want to be included in our cooperation, but as a minimum, answers to requirements regarding palm oil, sustainable soy, packaging and sustainable fishing as mentioned in the requirement specification must be filled in.

# The National Procurement Officer Network and The Inspiration Catalouge

- **The National Procurement Officer Network** is hosted by the Danish Ministry of Environment and chaired by the Municipality of Copenhagen. We share knowledge, encourage and inspire each other.
- The Inspiration Catalogue is a catalogue of **green initiatives**. The intention is that **the catalog will go in depth with different topics**, and provide inspiration for how they can be incorporated into tenders in different ways. The facilitator continues to gather inspiration and add new topics so that the material is continuously updated with **"State of the art - for the moment"**.
