# Procurement details

## Contract for Socially Responsible Procurement

Outlined based on the UN's guiding principles for business and human rights, with due diligence assessment as a method

- Compliance with international conventions and working environment legislation in country of production
- Policies and routines
- Contract follow-up
- Sanctions, in case of violation of points 1-3

## Qualification requirement

- System for traceability in the supply chain
- Riskassessment of selected products related to the tender
- Code of conduct

## Technical specifications

- The manufacturer of the device must follow the guidelines in OECDs Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas.
- The manufacturer of the hardware must be certified in accordance with the Responsible Minerals Initiative (RMI) or equivalent.

# Social Award criteria **60%**

---

## **Supplier's system for socially responsible trading - 25%**

The company's internal system for responsible trading

## **The manufacturer's code of conduct - 25%**

Including lists of extraction facilities, mining sites and other locations relevant for the products offered

## **Capacity building related to the supply chain - 25%**

The supplier's program with capacity building in its supply chain

## **External cooperation - 25%**

Sustainability report and other evidence of collaborations

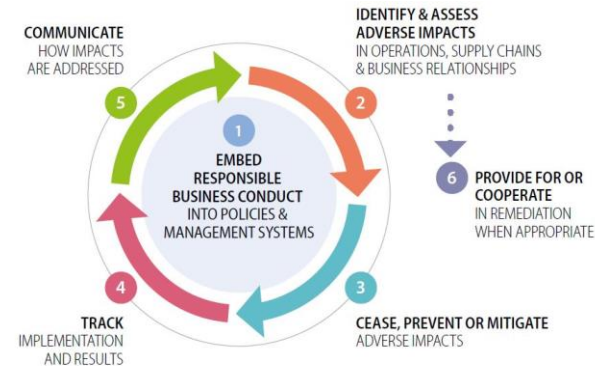

# Lessons learned

Long evaluation process, deeper knowledge and expertise needed to evaluate

Good depth of information regarding internal system for socially responsible trading, for both the contract partner and the Chromebook manufacturer. In line with The OECD Due Diligence guidelines for responsible business.

Need to further develop the criteria and be more specific about points of evaluation.

To implement social criteria is a long-term process and must correspond with the development in the industry
