• Questions & discussion
Setting the scene: Project Any

The main goal for Project Any

*Design and implement a new Datacenter*  
*Scalable, future proof, decrease operational workload and*  
*ANY*

*Any place, Any time, Any device*
Setting the scene: Project Any

Our solution:

A Software Defined Datacenter (SDDC) and End-User Computing environment (EUC)

Based on VMware technologies

Virtual Desktop Infrastructure
Tender goals

Selecting one supplier for workplace hardware which:

• Proactively thinks a long with Haarlem and anticipates the needs of Haarlem;
• Contributes to the Agile methodology;
• Identifies with the socially responsible criteria and Electronics Watch clauses.

Gemeente Haarlem wants to:
• Supply and implement hardware for the workspace. Efficient and uniform;
• Facilitate a workspace that sparks satisfaction amongst employees;
• Dispose old hardware in a Sustainable and responsible manner.
• Contribute to the social responsibility goals

What we have in mind
What we have in mind
What we have in mind
What we have in mind
Services to include? Or not to include?

- What are your recommendations?
- What makes a good service provider for workplace hardware?
- What kind of award criteria would you like to see in our Tender concerning services?
Sustainable & Responsible hardware disposal

• In line with Haarlem Circulair 2040 Program

  “No waste, no outages”

• Haarlem is looking for innovative approaches

  “More circularity is better”
Social Responsibility - Award Criteria

• Tenderers write a concept describing their current development status and their plans for the coming years

How might you ensure compliance with social standards, both in the manufacture of the products and in the extraction of raw materials?

Please provide us with a concept that defines your way to be able to disclose mines:
• (a) discuss the steps you are planning for the coming 3 years
• (b) discuss the systems you are planning to set up
• (c) discuss the resources you are planning to provide for this process
• (d) discuss the way you are planning to report on the development and results of this process
